WRITE UP

Fred Wollner is a South African cinematographer based in Johannesburg and has been working in the film industry since 2008. While his focus has been on cinematography since 2012, he has also shot, edited and directed a wide variety of film and television projects. The fact that he has had the opportunity to take on these different roles, has allowed him to understand projects holistically, so that he is now able to find the best way to communicate the original vision when he films. Fred believes that every great shot begins with an understanding of what you are communicating, and why.
